**SAMS DATA ENTRY REQUIREMENTS**

OPTIONS consumer information and transactions are recorded in SAMS. This information includes consumer details and National Aging Program Information System (NAPIS) data, Care Enrollments, Care Plans, Service Plans, Service Orders/Deliveries, Journal Notes, Assessments and Actions.

| | • If a consumer has had a level of care determination, the level of care is entered into the NAT, Question 19. A.1. This will automatically transfer the answer into SAMS Consumer
Details. The data is recorded in a custom field “Assessed and Determined NFCE”, in the Care Management section.
