Needs Assessment Tool Form Instructions

The Needs Assessment Tool (NAT) is the assessment tool for the OPTIONS Program and its purpose is to gather information about the individual. The information contained in the NAT is used to determine an individual’s service needs, strengths, resources, preferences, and goals to develop a person-centered care plan.

The Care Manager has the responsibility to ensure all sections of the NAT are completed accurately and in the manner described in these instructions. Accurate completion of the NAT will not only benefit the consumer, but will aid the Department of Aging (PDA) with quality initiatives and improve data integrity regarding the consumers served.

The NAT contains the VAMC Saint Louis University Mental Status (SLUMS) Examination. The SLUMS has been placed before the medical condition section and shall be completed. Placing the mental examination before the medical section enables the Care Manager to determine the cognitive ability of the individual to answer questions pertaining to medical diagnoses and functional ability.

Medical conditions display drop-down boxes for each type of diagnoses. The category of “Other” for selections of diagnoses not provided and a Notes section for expanded documentation in each section is available. In addition to determining if a medical diagnosis or condition affects the individual’s ability to function, questions are included to assist the Care Manager in determining who is managing care of the conditions and if additional care or assistance is needed.

The NAT contains an algorithm that will calculate a Needs Assessment Score (NAS). The NAS is used for placement on a wait list, if necessary, and is one of the factors of determining if the OPTIONS consumer would receive a cost cap exception. It is imperative ALL questions in the NAT be answered to ensure a correct NAS is calculated. Care Managers, Assessors, Registered Nurses, Supervisors, and other appropriate staff shall ensure that they use their individually assigned user ID’s and passwords when logging into SAMS. The electronic signature in SAMS will indicate that the data recorded is complete and accurate. The electronic signature replaces the need for hard copy signatures.

In order to fully assess a consumer’s needs, a NAT shall be completed in person, in the consumer’s home or other residential setting. There are some situations where a NAT may be initiated while a consumer is in a facility. The NAT is only considered complete when all areas are addressed and the Supervisor has approved and signed off on the tool.
Questions with an asterisk (*) indicate that question captures information that is required for the National Aging Program Information System (NAPIS) reporting, which PDA uses for Federal reporting purposes.

1. INTRODUCTION

1.A. INDIVIDUAL’S IDENTIFICATION

**Question 1: Date of the face to face interview for Needs Assessment Tool (NAT):**

Using the MM/DD/YYYY format, document the date that the face to face interview was completed.

**Question 2: Individual’s Last Name:**

2. USE OF MEDICAL SERVICES

2.A. HOSPITAL, NURSING FACILITY, ER, INPATIENT PSYCHIATRIC VISITS/STAYS

Admission categories include inpatient admission or outpatient observation status. An individual is an inpatient when formally admitted to a hospital with a doctor’s order. Outpatient observation is not considered a hospital admission. An outpatient receives emergency department services, observation services, outpatient surgery, lab tests, X-rays, or any other hospital services, and the doctor has not written an order to admit the
individual to a hospital as an inpatient. In these cases, the individual is considered an outpatient even if they spend the night at the hospital.

**Question 1: Has the individual stayed in the HOSPITAL in the LAST 12 MONTHS?**

Select No, Yes, or Unable to Determine. If No, Skip to 2.A.3. If Yes, Complete 2.A.2. If Unable to Determine, Document Details in Notes section.

**NOTE:** Stayed means the individual was admitted to the hospital.

**Question 2: The approximate number of times the individual has stayed overnight in the HOSPITAL in the LAST 12 MONTHS. Document Details in Notes:**

Document the number of times the individual was admitted to a hospital in last 12 months. Document Details in Notes section.

**NOTE:** Number of times does not mean days in the hospital, but number of separate times the individual was admitted to the hospital.

**Question 3: The approximate number of times the individual has visited the ER in the LAST 12 MONTHS and was NOT admitted:**

Document the number of times the individual visited the ER in the last 12 months and was not admitted. Document Details in Notes section.

**Question 4: The approximate number of times the individual was admitted to a NURSING FACILITY in the LAST 12 MONTHS: Document Details in Notes.**

Document the number of times the individual stayed at the Nursing Facility in the last 12 months. Document Details in Notes section.

**NOTE:** Number of times does not mean days in the nursing facility, but number of times the individual was admitted to the nursing facility.

**Question 5: The approximate number of times the individual was an inpatient in a PSYCHIATRIC Facility in the LAST 24 MONTHS: Document Details in Notes.**

Document the number of times the individual has had inpatient Psychiatric Visits/Stays in the last 24 months. Document Details in Notes section.

**NOTE:** Number of times does not mean days in the psychiatric facility, but number of separate times the individual was admitted to the psychiatric facility.
**Question 6: The number of times the individual has had outpatient surgery in the LAST 12 MONTHS:**

Document the number of times the individual has had outpatient surgery in the last 12 months. If not listed, select “Other” and Document Details in Notes section.

**2.B. PRIMARY PHYSICIAN INFORMATION**

**Question 1: Does the individual have a PRIMARY care physician?**

Select No or Yes. If No, Document Details in Notes section.

**Question 2: PRIMARY Physician’s Name:**

Document the name of the individual’s primary physician.

**Question 3: PRIMARY Physician’s Street Address:**

Document the primary physician’s street address.

**Question 4: PRIMARY Physician’s City or Town:**

Document the primary physician’s city or town.

**Question 5: PRIMARY Physician’s State:**

Document the primary physician’s state.

**Question 6: PRIMARY Physician’s Zip Code:**

Document the primary physician’s zip code.

**Question 7: PRIMARY Physician’s Business Phone Number: (Requires 10 digits to transfer to SAMS, optional 1-5 digit extension.)**

Document the primary physician’s 10-digit telephone number. A 1-5 digit extension is optional.

**Question 8: PRIMARY Physician’s FAX Number:**

Document the primary physician’s 10-digit fax number.

**Question 9: PRIMARY Physician's E-MAIL ADDRESS:**

Document the primary physician’s e-mail address.
Question 10: Additional Physicians:

Document names and contact information of any additional physicians for the individual (if applicable). Document Details in Notes section.

Question 11: Does the individual receive alternative medical care from a practitioner?

Select No or Yes. If No, Skip to 3.A.1. If Yes, Complete 2.B.12.

Question 12: Select the type of alternative medical care - Document Details in Notes:

Select the type of alternative medical care that the individual is receiving. If not listed, select “Other” and Document Details in Notes section.

3. SAINT LOUIS UNIVERSITY MENTAL STATUS (SLUMS)

The SLUMS identifies the subtle symptoms of dementia and allows individuals to seek medical intervention early for the treatment of dementia. Early intervention may affect the disease process. The SLUMS consists of 11 items, and measures aspects of cognition that include orientation, short-term memory, calculations, naming of animals, clock drawing, and recognition of geometric figures. The SLUMS is a screening test and does not substitute for a full diagnostic work-up for Alzheimer’s disease and related disorders.

Scores range from 0 to 30, with scores of 27-30 considered normal in a person with a high school education. Scores between 21 and 26 suggest Mild Neurocognitive Disorder, and scores between 0 and 20 indicate dementia.

Prior to conducting the SLUMS Exam, the Care Manager needs to determine that the individual is alert and that they are fully awake and able to focus. This is determined by asking and documenting questions 3.A.1-4. The Care Manager would not do the exam if the individual presents with the following:

- Extremely ill
- Falling asleep
- Blind
- Unable to write
- Drowsy/confused/distracted/preoccupied
The Care Manager needs to be prepared for the exam by having the following materials available:

- Watch with a second hand
- Form with clock outline and geometric figures

Cognitive refers to brain processes such as thinking, attention, perception, learning, memory, reasoning, problem solving, decision making, and planning. Cognitive processes are distinguished from emotional processes (feelings) and behavioral processes (actions).

Orientation refers to the cognitive ability of an individual to know who they are, where they are, and what day and year it is. Assessment of orientation is an important part of any mental status examination, as it helps to evaluate the changes that a disease process may have brought about.

Cognitive symptoms refer to problems with the processes mentioned above in the cognition definition, such as thinking, memory, and learning.

Mild Neurocognitive Disorder (MNCD) occur as people progress from normal aging to early Alzheimer’s.

Mild Cognitive Impairment (MCI) is the type of memory loss once considered normal that now may be seen as an early sign of disease.

### 3.A. SLUMS PREPARATION

**Question 1:** Determine if the individual is alert. Alert indicates that the individual is fully awake and able to focus.

Select one response which best indicates the individual’s current level of alertness.

**Question 2:** Do you have trouble with your memory?

Select No or Yes.

**NOTE:** Be aware that many people with dementia will answer that question by indicating “no”. A common symptom of persons with dementia is anosognosia (the literal translation is that “they do not know that they do not know”). Thus, if an individual says “no”, one cannot conclude that they are free of cognitive impairment.
Question 3: SLUMS is being completed as which of the following?

Select one response.

Question 4: May I ask you some questions about your memory?

Select No, Yes, or Other. If No or “Other”, Document Details in Notes section.

Question 5: Is the individual able to complete the SLUMS Exam?

Select No or Yes. If No, Document Details in Notes section. If the individual refuses to take the test, Document Details in Notes section and proceed to Section 3.D.1a.

3.B. SLUMS QUESTIONNAIRE (Each score is beside the response.)

Question 1: What DAY of the week is it?

Document the individual’s response to the question as correct or incorrect.

NOTE: Remember the answer is incorrect if the individual does not answer.

Question 2: What is the YEAR?

Document the individual’s response to the question as correct or incorrect.

Question 3: What is the name of the STATE we are in?

Document the individual’s response to the question as correct or incorrect.

Question 4: Please remember these five objects, I will ask you what they are later. Apple, Pen, Tie, House, Car:

Recite the five objects to the individual clearly and slowly. Ask the individual to repeat them back to you and tell them that you will ask them again later. The Care Manager may repeat the objects as many times as it takes for the individual to repeat them back correctly.

The response to this question is recorded in question #7.
**Needs Assessment Tool Form Instructions**

**Question 5a:** You have $100 and you go to the store and buy a dozen apples for $3 and a tricycle for $20. How much did you spend?

Document the individual’s response to the question as correct, incorrect or unanswered.

**Question 5b:** How much do you have left?

Document the individual’s response to the question as correct, incorrect, or unanswered.

The Care Manager may repeat the question once and shall not give the individual any hints to the answer.

**Question 6:** Please name as many animals as you can in one minute:

Select the appropriate response. The Care Manager may accept names of animals only and not categories. Names of birds and fish are acceptable answers. Give the individual one minute to answer and be sure to time them.

**Question 7:** What were the five objects I asked you to remember? (1 point for each one correct):

Select each response that the individual answers correctly.

**Question 8:** I am going to give you a series of numbers and I would like you to give them to me backwards. For example, if I say four-two, you would say two-four.

The Care Manager should state each number by its individual name. 87 is pronounced eight, seven; 649 is pronounced six, four, nine; 8537 is pronounced eight, five, three, seven.

Select each response that the individual answers correctly.

**Question 9:** This is a clock face. Please put in the hour markers and the time at ten minutes to eleven o’clock:

This is the clock drawing. The Care Manager will need to utilize the form with clock face and geometric figures. The hour hand shall be shorter than the minute hand and the minute hand shall point at the 10 and the hour hand point at the 11.

Select each response that the individual answers correctly.
**Question 10a: Place an X in the triangle:**

The Care Manager will utilize the same form as the clock diagram or enlarge the diagrams on a separate sheet of paper to accommodate those with visual impairments.

Document the individual’s response to the question as correct or incorrect.

**Question 10b: Which of the figures is the largest?**

The Care Manager asks the individual to place an X in the triangle. Then the Care Manager asks the individual “Which of the above figures is largest?”

Document the individual’s response to the question as correct or incorrect.

**Question 11: I am going to tell you a story. Please listen carefully because afterwards, I’m going to ask you some questions about it.**

Jill was a very successful stockbroker. She made a lot of money on the stock market. She then met Jack, a devastatingly handsome man. She married him and had three children. They lived in Chicago. She then stopped work and stayed at home to bring up her children. When they were teenagers, she went back to work. She and Jack lived happily ever after.

The Care Manager should not repeat the story but read it slowly and make sure the individual is paying attention. The answer of Chicago as the state gets no credit but the Care Manager may prompt the individual once by repeating the question.

Select each response that the individual answers correctly.

**3.C. SLUMS RESULTS**

**Question 1: SLUMS Consumers Total Score:**

This will be an INDICATOR. The score for this exam will be automatically calculated in the NAT.

**Question 2: Record the highest grade (1-12) the individual completed in school:**

Document the highest grade (1-12) the individual completed in school.
Question 3: Identify the highest educational degree that the individual obtained:

Select one response.

Question 4: Care Manager’s conclusion after completion of the individual’s SLUMS Exam:

Select one response based on the SLUMS Score and the education level.

**3.D. COGNITIVE FUNCTION**

Question 1a: Does the individual exhibit any cognitive impairments?

Select No or Yes. If No, Skip to 4.A.1. If Yes, Complete 3.D.

Question 1b: Does this impairment interfere with the individual’s ability to function daily?

Select No or Yes. If No, Skip to 4.A.1. If Yes, Document Details in Notes section.

Question 1c: Is the individual able to direct/supervise his own care with the impairment?

Select No or Yes. If No, Complete 3.D.1d.

Question 1d: Does the individual have a representative who is able and willing to direct the individual’s care because of the impairment?

Select No or Yes. If No, Skip to 4.A.1. If Yes, Complete 3.D.1e.

Question 1e: Document contact information (Name, Relationship, Phone Number, etc.) of the individual who is willing to supervise care. Additional space in Notes:

Document the contact information of the individual who is willing to supervise care. Document Details in Notes section, if needed.
4. DIAGNOSES

The purpose of this section is to document six important questions:

➢ Individual’s diagnoses or conditions specified in each question.
➢ Signs and symptoms specific to each medical diagnosis or condition.
➢ If the individual is being treated for the medical conditions.
➢ Do the diagnoses affect the individual’s ability to function?
➢ Who is managing the care of the individual’s conditions?
➢ Does the individual need additional assistance in managing the care of their medical condition?

Self-manage: Having the knowledge, awareness and capability to manage their care as it pertains to a diagnosis or disability. This would include treatments or any prescribed medical measures for the diagnosis as directed by the individual’s physician.

All questions shall be answered. There may be more than one diagnosis in each section. Select the correct boxes for each and document additional details in the Notes section about the diagnosis. In the event that there are no selections listed for the diagnosis, select “Other” and Document Details in Notes section.

Some medical terminology may not be familiar. A resource guide is located on the last page of this document which may be helpful.

4.A. RESPIRATORY

**Question 1: Select all RESPIRATORY diagnoses:**

Select appropriate response(s) for all diagnoses. If None, Skip to 4.B.1. If not listed, select “Other” and Document Details in Notes section.

**Question 2: Signs and symptoms of RESPIRATORY diagnoses:**

Select appropriate response(s) for all signs and symptoms specific to Respiratory diagnoses. If current signs and symptoms are not listed, select “Other” and Document Details in Notes section.
Question 3: Current treatments for RESPIRATORY diagnoses:

Select appropriate response(s) for all treatments the individual is receiving. If medications is selected, list in 9.D.3. If the treatment is not listed, select “Other” and Document Details in Notes section.

Question 4: Do the RESPIRATORY diagnoses affect the individual’s ability to function?

Select No or Yes. If Yes, Document Details in Notes section.

Question 5: Who manages care of the RESPIRATORY condition(s)?

Select appropriate response(s) for who manages care of the condition. If not listed, select “Other” and Document Details in Notes section.

Question 6: Does the individual need additional assistance beyond that available from existing or accessible informal and formal supports in managing the care of the RESPIRATORY condition(s)?

Select No or Yes. If Yes, Document Details in Notes section.

4.B. HEART/ CIRCULATORY SYSTEMS

Question 1: Select all HEART/CIRCULATORY systems diagnoses:

Select appropriate response(s) for all diagnoses. If None, Skip to 4.C.1. If not listed, select “Other” and Document Details in Notes section.

Question 2: Signs and symptoms of HEART/CIRCULATORY systems diagnoses:

Select appropriate response(s) for all signs and symptoms specific to Heart/ Circulatory system diagnoses. If current signs and symptoms are not listed, select “Other” and Document Details in Notes section.

Question 3: Current treatments for HEART/CIRCULATORY systems diagnoses:

Select appropriate response(s) for all treatments the individual is receiving. If Medications is selected, List in 9.D.3. If the treatment is not listed, select “Other” and Document Details in Notes section.
Question 4: Do the HEART/CIRCULATORY systems diagnoses affect the individual’s ability to function?

Select No or Yes. If Yes, Document Details in Notes section.

Question 5: Who manages care of the HEART/CIRCULATORY systems condition(s)?

Select appropriate response(s) for who manages care of the condition. There may be more than one selection. If not listed, select “Other” and Document Details in Notes section.

Question 6: Does the individual need additional assistance beyond that available from existing or accessible informal and formal supports in managing the care of the HEART/CIRCULATORY systems condition(s)?

Select No or Yes. If Yes, Document Details in Notes section.

4.C. GASTROINTESTINAL

Question 1: Select all GASTROINTESTINAL diagnoses:

Select appropriate response(s) for all diagnoses. If None, Skip to 4.D.1. If not listed, select “Other” and Document Details in Notes section.

Question 2: Signs and symptoms of GASTROINTESTINAL diagnoses:

Select appropriate response(s) for all signs and symptoms specific to Gastrointestinal diagnoses. If current signs and symptoms are not listed, select “Other” and Document Details in Notes section.

Question 3: Current treatments for GASTROINTESTINAL diagnoses:

Select appropriate response(s) for all treatments the individual is receiving. If Medications is selected, List in 9.D.3. If the treatment is not listed, select “Other” and Document Details in Notes section.

Question 4: Do the GASTROINTESTINAL diagnoses affect the individual’s ability to function?

Select No or Yes. If Yes, Document Details in Notes section.
Question 5: Who manages care of the GASTROINTESTINAL condition(s)?

Select appropriate response(s) for who manages care of the condition. If not listed, select “Other” and Document Details in Notes section.

Question 6: Does the individual need additional assistance beyond that available from existing or accessible informal and formal supports in managing the care of the GASTROINTESTINAL condition(s)?

Select No or Yes. If Yes, Document Details in Notes section.

4.D. MUSCULOSKELETAL

Question 1: MUSCULOSKETAL diagnoses and/or signs and symptoms of MUSCULOSKELETAL diagnoses:

Select appropriate response(s) for all diagnoses and/or signs/symptoms specific to Musculoskeletal diagnoses. If None, Skip to 4.E.1. If not listed, select “Other” and Document Details in Notes section.

10. ACTIVITIES OF DAILY LIVING (ADLs)

The Care Manager shall assess the individual’s ability to perform their ADLs and the ability to manage them with reasonable safety. There may be instances in which the individual has no opportunity to perform ADL tasks because they may already be in a facility, a hospital, or family members are assisting. Therefore, in order to accurately assess the individual’s ability to perform any ADLs, the Care Manager is required to review facility charts in addition to asking the individual and evaluating their abilities.

ADL’s include:

- Bathing
- Dressing
- Grooming
- Eating
- Transferring
- Toileting
- Bladder/Bowel Incontinence
- Walking

**NOTE:** If “Total Assistance” is selected for any ADL, skip forward to the next appropriate question, as designated in the NAT.

**Independent:** The ability to completely manage the ADL without assistance. If an individual can manage the ADL on their own, including the use of an assistive device, they are independent. For example, an individual sits on a shower seat and uses a hand held showerhead to bathe. Assistance with these devices or any other aspects of bathing is not required. The Care Manager shall make a note within the response of “Independent”, listing any assistive devices the individual uses in order to complete the ADL independently.

**Limited Assistance:** Some assistance is required for the individual to complete the ADL. For example, an individual sits on a shower seat and uses a hand held showerhead to bathe. The individual has limited range of motion in their arm because of a shoulder replacement surgery and arthritis. They require assistance with handling and maneuvering the showerhead in order to wash themselves. Select the response(s) in the drop down menu that best describes what assistance is being provided.

- **Guided Maneuvers:** Hands-on assistance or weight-bearing support is required while performing ADL’s.

**Total Assistance:** Full assistance of another individual is required to perform the ADL.

RESOURCES

4.B HEART/CIRCULATORY SYSTEMS

Ascites: An abnormal accumulation of fluid in the abdomen which results from high pressure in the blood vessels of the liver and low levels of a protein called albumin.

4.E. SKIN

Wound: A break in the continuity of soft parts of body structures caused by violence or trauma to tissues. It may be the result of an accident or disease. Wounds are not staged.

Ulcer: An open sore or lesion of the skin or mucous membrane accompanied by sloughing or inflamed necrotic tissue. Ulcers are usually caused by irritation as in the case of bedsores.

Unstageable Ulcer: A full thickness tissue loss in which the base of the ulcer is covered by slough (yellow, tan, gray, green or brown) and/or eschar (tan, brown or black) in the wound bed. The “base of the ulcer” is used to denote the inability to determine the depth.

Pressure Ulcer Staging is found on the last page for reference.

4.G. GENITOURINARY

Urinary incontinence almost always results from an underlying treatable medical condition. If an individual is incontinent of urine do not assume that it is caused by a bladder disorder such as neurogenic bladder, overactive bladder or urinary retention. Incontinence has many causes. Try to find out the underlying diagnosis that is causing the incontinence.

Neurogenic bladder dysfunction, sometimes simply referred to as neurogenic bladder, is a dysfunction of the urinary bladder due to disease of the central nervous system or peripheral nerves involved in the control of micturition (urination). Neurogenic bladder usually causes difficulty or full inability to pass urine without use of a catheter or other method.

7. MENTAL HEALTH

Mental illness is defined as a mental or bodily condition marked primarily by sufficient disorganization of personality, mind, and emotions to seriously impair the normal psychological functioning of the individual. The illness may result in a disruption in a person's thinking, feeling, moods and ability to relate to others.
Prompting questions: Have you ever seen a psychiatrist? Have you ever been told that you have any psychiatric problems? Did you receive treatment?

9. OTHER MEDICAL INFORMATION

Elopement: An individual who is cognitively, physically, mentally, emotionally, and/or chemically impaired; wanders away, walks away, runs away, escapes, or otherwise leaves their environment unsupervised or unnoticed.

9.B. FRAILTY

The term “frail” is intended to identify individuals at greatest risk of adverse outcomes including falls, worsening disability, institutionalization and death. Frailty is a term often used to label the condition of an older person who has health problems, has lost functional abilities and is likely to deteriorate further. It describes a health state that could occur as the result of a number of underlying health conditions.

9.D. MEDICATION MANAGEMENT

Central venous catheter ("central line", "CVC", "central venous line" or "central venous access catheter") is a long thin flexible catheter placed into a large vein in the neck (internal jugular vein), chest (subclavian vein or auxiliary vein) or groin (femoral vein) that is used to give medicines, fluids, nutrients, or blood products over a long period of time, take frequent blood samples, to receive kidney dialysis for kidney failure, give long-term medicine treatment for pain, infection, or cancer, or to supply nutrition. A central venous catheter can be left in place far longer than an intravenous catheter (IV).
Pressure Ulcer Staging

Stage I:
An observable pressure related alteration of intact skin whose indicators as compared to the adjacent or opposite area on the body may include changes in one or more of the following: skin temperature (warmth or coolness), tissue consistency (firm or boggy feel) and/or sensation (pain, itching). The ulcer appears as a defined areas of persistent redness in lightly pigmented skin, whereas in darker skin tones, the ulcer may appear with persistent red, blue, or purple hue.

Stage II:
Partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister or shallow crater.

Stage III:
Full thickness skin loss involving damage to, or necrosis of, subcutaneous tissue that may extend down to, but not through, underlying fascia. The ulcer presents clinically as a deep crater with or without undermining of adjacent tissue.

Stage IV:
Full thickness skin loss with extensive destruction, tissue necrosis, or damage to muscle, bone, or supporting structures (e.g. tendon, joint capsule). Undermining and sinus tracts also may be associated with Stage IV pressure ulcers.

Eschar
Thick dry black necrotic tissue — Unstageable
