NOTE: A. The consumer's co-payment amount, when subtracted from their monthly income, cannot reduce the consumer's income to less than the current 125% Federal Poverty Level. If this occurs, then the consumer co-payment will be capped at that dollar amount that reduces the remaining consumer income to the 125% Federal Poverty Level.

NOTE: B. Remember that the AAA may opt not to bill consumers for monthly co-payments of \$10 or less. However, with the consumer's consent, AAAs have the option to bill consumers whose monthly co-payment is less than \$10 on an annual, semi-annual, or quarterly basis whichever is cost-effective and convenient for the consumer.
